Human reactive-only TIED | fit RT distributions; ignore choices

ASL 20 cd/m² · ASL 40 cd/m² · RT-only model · Previous joint model · Data steps

Condition = RT | 0.2 ≤ RT_s ≤ 1.5 s | delay prior 0–200 ms
RT-only: sum left/right densities; response side ignored | all curves conditional on the fitted RT window
Arithmetic physical posterior means | pooled raw trials; actual stimulus frequencies | variational approximation
