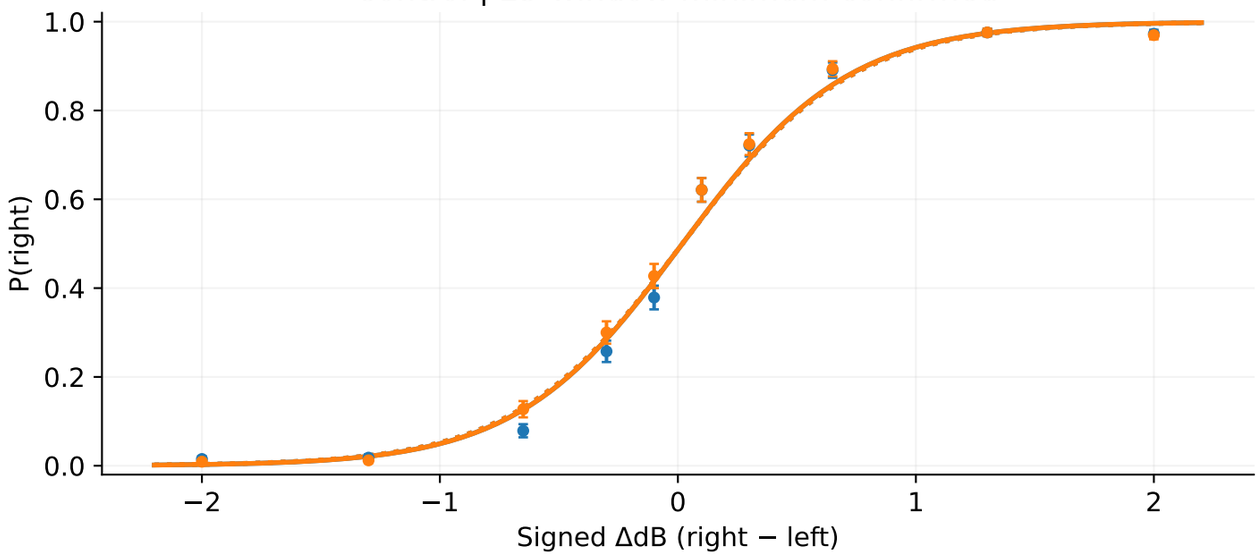
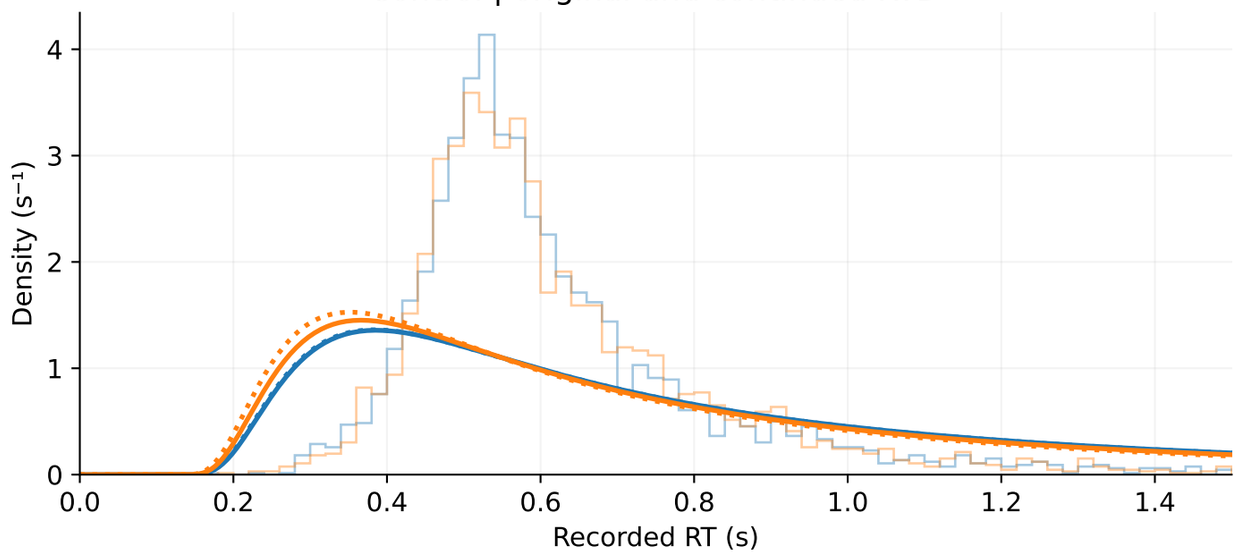
Human reactive-only TIED | does strict minimum confirmation improve fit quality?

ASL 20 cd/m² — Continued mean parameters — Data RTD
ASL 40 cd/m² ····· Original mean parameters

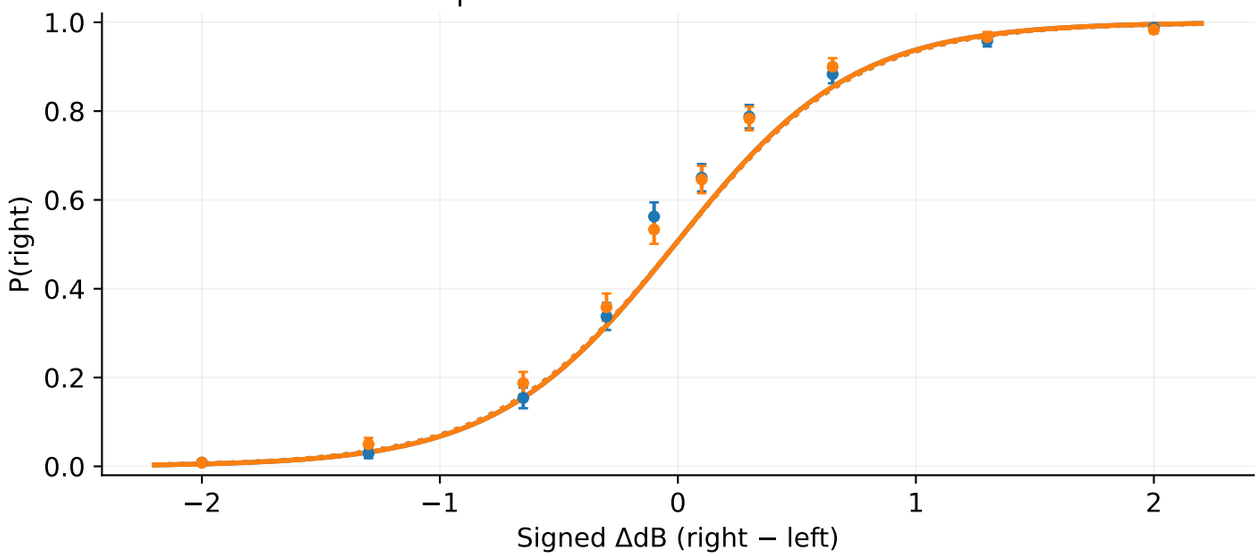
Control | 25-window minimum confirmed



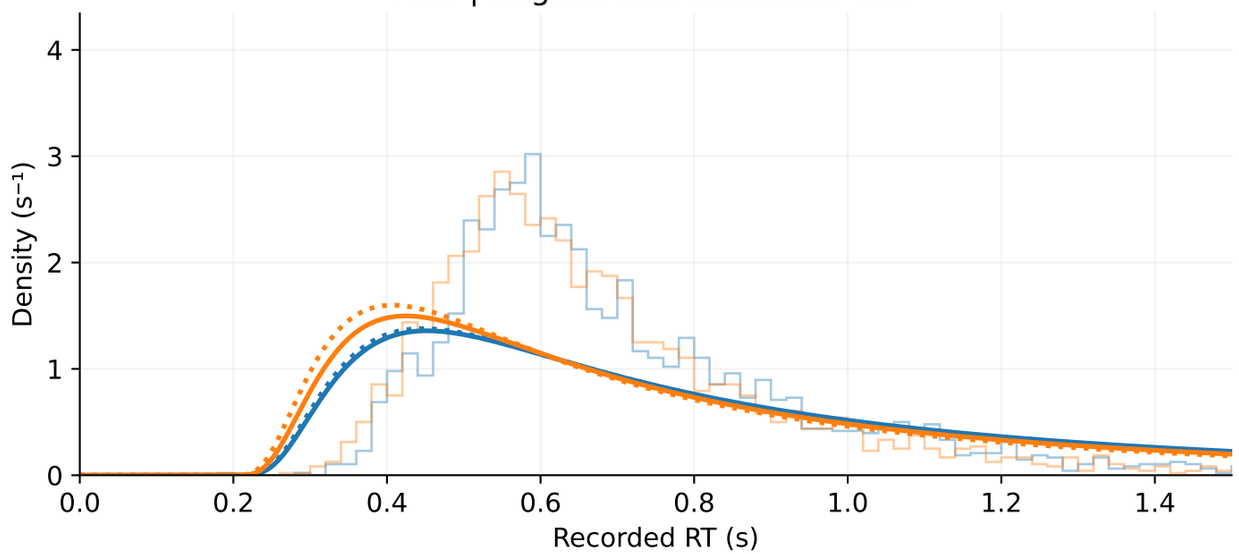
Control | original and continued RTD



ASD | 25-window minimum confirmed



ASD | original and continued RTD



RT only | 6,600 Control / 4,800 ASD trials | same five shared parameters, priors, and joint RT/choice likelihood
Arithmetic physical posterior means | RTDs conditional on 0–3 s; zoom retains normalization | blue/orange = ASL 20/40 cd/m²
