
Training 16; confirmed repeat rule; 807 short-sound rows removed in preparation; all 53 animals retained.
Correct/error choices; no RT restriction. ABL 59 → 60; signed ILDs ±1/2/4/8/16. Equal mean of measured ABL 20/40/60 P(right) at each ILD; average first, then fit.
Unweighted four-parameter fits to ten ILD points. Colors identify genotype. n is the recorded eligible choice count.
