
Correct/error trials; finite timed_rt in [0, 1] s. Training 16; confirmed repeat rule; short-sound rows removed from prepared CSV.
ABL 59 → 60; signed ILDs ±1/2/4/8/16 pooled within each ABL. Solid 20 ms steps; density = count / (curve n × 0.020 s); area 1. Raw trials pooled.
Display 0–0.6 s only; normalization and printed n still use 0–1 s.
